

## **AMENDMENTS TO THE CLAIMS**

The following listing of claims will replace all prior versions and listings of claims in the application.

### **LISTING OF CLAIMS**

1. (Previously Presented) A method of inputting letters in a wireless terminal comprising steps of:

a) typing in first and last letters of a word to be input, and pressing a function key;

b) recognizing as the last letter of the word to be input a letter typed-in prior to pressing the function key;

c) from a word repository, retrieving words having the same first and last letters as the typed-in first and last ones and displaying the retrieved words on a display device; and

d) selecting a desired word from the displayed words, and converting the typed in first and last letters into the selected word,

wherein, in step c), a word to be retrieved has more than 6 letters;

wherein a cursor moves in front of the last letter so as to enable an additional letter to be input; and

wherein the retrieved word is displayed in a sequence of higher retrieval frequency.

2-18. (Cancelled).
